

We at the Department of Science and Technology have taken note of the issues and grievances raised by DOST-PAGASA employees with respect to the availment of Magna Carta benefits as provided under Republic Act 8439.

Hence, we are now working toward a proper resolution to this in conjunction with other government institutions.

Rest assured that the Department is prioritizing this matter and is standing in full support for the long-term financial security and well-being of its most precious resources – its people.
